Standardized Dairy Blends

Are your standardization costs becoming Lactose Intolerant?

IdaPro® MPP opens a world of savings options for standardized dairy blends.

Fact: Lactose and MPP are the only ingredients allowed by The International Codex Standard for the standardization of milk powders.*

Fact: IdaPro MPP is manufactured from fresh pasteurized skim milk using a proven low-heat membrane filtration process.

Fact: The following dairy powder blends could realize considerable savings through the use of IdaPro MPP: whole milk powder blends, ice cream base blends, and the standardization of milk protein concentrates.

Fact: IdaPro Milk Permeate is a sought after ingredient in a multitude of dairy blends because of its mild, sweet, milky flavor, non-hygroscopicity and uniform crystal size. These characteristics enhance ease of blending for the manufacturer and ease of use for the end user.

Question: So why haven't you contacted us to learn more about how our top quality IdaPro MPP can improve your bottom line?

* The adoption in 1999 of the Codex Standard for Milk Powders and Cream Powder, (CODEX STAN 207-1999) provided for the standardization to a minimum of 34% of the protein solids non-fat. The ingredients allowed for this purpose are restricted to milk permeate (permeate produced by ultra-filtration of milk), lactose or a combination of both.
